LOCAL INTELLIGENCE.

PASSENGER TRAVEL.

ARRIVALS.

BY STEAMER & RAILROAD'S HAMILTON LINE.

From Tarry T. R. Butler

LOCAL MINING REVIEW.

During the past week there has been shipped in Union from Poché by Wells, Fargo & Co. \$20,000, a decrease in last week's shipment owing to the Eureka stage having made one trip less. The machinery for the Meadow Valley mine is now arriving rapidly and will all soon be in Poché. The work on the stone foundation and the beds for the machinery is being pushed ahead rapidly—nothing is neglected in the way of pushing ahead the work as fast as possible. The Raymond & Ely mine continues its work without change. The pump is working satisfactorily. Ore from Toquerville continues to arrive daily, thirty tons having arrived during the past week, all of which is being worked at the Alps mill and is yielding well. The arrival of Martin Tarpey and T. R. Butler will start the Washington and Crocker mine and push forward matters rapidly in the Poché and Antilles. Arrangements are being consummated to again start work on the Hunt and Hunt mine on a better basis than ever heretofore. The main shaft of the American Flag mine will be sunk one hundred feet deeper, at which depth good ore may be expected. With the work to be again commenced on the various mines and the pushing forward of the Meadow Valley, there will be very few or no idle men in Poché, which will cause a revival of trade in all branches of business here. Poché may look for much better times before long.

RAYMOND AND ELY.

No new work to report on this mine, the prospect work on the eighth, ninth, tenth and eleventh levels continues to be pushed with good success. The extraction of ore continues about the same averaging from seventy to seventy-five tons daily. The company's mill at Bullionville, is now running to its full capacity, thirty stamps, on account of an accumulation of ore. The Nevada Central train is kept running steadily for the purpose of supplying the mill. No change in the stroke of the pump at the mine, it continuing to work with regularity and keeps in first-class order. The general appearance of the mine continues favorable.

MEADOW VALLEY.

The machinery for the hoisting works of this mine, is arriving very fast and is being shipped from Eureka by fast teams as soon as the cars land it there. The timing of the roof is nearly completed, the buildings presenting a very imposing appearance. Chlorides continue to be worked on the 1200-foot level with fair success. The regular employees are busy sinking a winze and doing prospect work.

ALPS.

Continue extracting daily fifteen tons of ore from the mine, which assays and averages in working about the same. Work on the various levels continues as usual without any variation. The white quartz vein, containing free gold, continues to yield well, some portions of this ore are placed with the silver value of both grades of mineral are enabled to be extracted. The general appearance of the mine continues to look well.

ALPS MILL.

This mill for the past week has been running altogether on ore from the Alps mine and from Toquerville. Ten stamps are kept going for ore from the Alps mine and five stamps for custom ore. The ore from Toquerville has generally worked well. Two lots arrived yesterday morning at the mill from that town, belonging to Ferris and Coschian; the pattery was immediately started to work on them.

ANTILLES.

Sinking on the main shaft of this mine progressed very well during the past week; the ground is soft and the contractors made a progress of fourteen feet during the week. The work is being pushed rapidly. Considerable change has taken place in the formation and prospects are fair.

POCHÉ.

The work of sinking on the main shaft below 1000-foot level is progressing rapidly, the depth having been extended ten feet during the week. The level from the 1000-foot station is being pushed forward rapidly in hopes that a good body of ore may be struck at that depth, of which there is every indication. T. R. Butler, the Superintendent of this mine, arrived from San Francisco yesterday.

AMERICAN FLAG.

Prospecting in the upper levels is going on with the usual force of men. These levels have a very encouraging look, presenting the appearance of having good ore in a short time. The contractors have not commenced yet to sink the 100 feet on the main shaft. They start to work on the first of June.

RETURNED.

Martin Tarpey, Superintendent of the Washington and Crocker mine, and T. R. Butler, Superintendent of the Poché and Antilles, arrived by yesterday's Hamilton stage. Butler has succeeded in growing fearfully thin on this trip, showing that the climate of San Francisco evidently did not agree with him.

The Hunt and Hunt mine was deeded yesterday to the various lienholders of claims against said mine.

W. R. Wilson is delivering ICE. if

MEANS WE KNOW.—Messrs. Wiederhold & Goodman have taken the initial step with the view to secure a salary of pictures of men of note residing at present on the Pacific Coast. Mr. Hale of the Alps M. Co., yesterday made a very acceptable addition to the collection already obtained by presenting to them an elegant and striking likeness of a gentleman well known to many of the "Old Boys" of Poché. It was given at once a conspicuous place in the gallery and will be on exhibition to-day.

ON THE OLD SPOT.—We are informed by A. H. Emanuel that the Record is now located on the exact spot where the paper was first issued on the 17th day of September, 1870. The office was afterwards taken by McDonald, who was replaced by the brick building we now occupy. The office has been moved four times since the paper was first started, and by accident and not by design do we find it once more occupying the same spot of ground where the paper was first issued.

JUSTICE'S COURT.—Affairs were very lively yesterday in the Court of Justice Allen. Several suits were commenced and the officers were kept busy throughout the day. The case of Campbell against Pollard was set for the 31st inst. A replevin suit was commenced by Sexton against Wood, et al., also a couple of other suits of no public interest.

It is suicide in the third degree, if not worse, to suffer a cough and cold to culminate in consumption, when a single bottle of Hale's Honey of Horehound and Tar, taken in time, would effect a perfect and permanent cure. Pike's Toothache Drops cure in one minute.

WILL LEAVE.—Andrew Ely will leave Poché on Monday's Eureka and Hamilton stage, his destination being Sacramento, at which place he intends taking up a permanent residence. Mr. Ely has resided in Poché since March, 1872, and leaves behind a host of friends.

PAINTED.—Lightner Hook & Ladder Company are having the front of their truck house painted and otherwise beautified. The name of the company will be placed on the building.

AT BOVER IN THE CASE OF DUC BELL, Judge Boreman denied the motion to admit the prisoner to bail. Bell's attorneys will test the case in the Supreme Court next term.

The main street of Poché presented a very lively appearance last evening, it being crowded with men who were out enjoying the pleasant evening and transacting business.

EPISCOPAL CHURCH.—Services will be held at the Episcopal Church at the usual hours morning and evening, Sunday-school at 2 p. m. Rev. R. H. Kline will officiate.

The roads being in such good condition, stages and backboards now arrived on schedule time. The Eureka and Hamilton stage arrived at 5 o'clock yesterday afternoon.

MILLINERY GOODS.—I have on hand a large and nice assortment of trimmed hats for ladies and children, which I will sell at cost prices.

Mrs. Ward, Lacour st.

CATHOLIC CHURCH.—Services will be held at the usual hours morning and evening in the Catholic Church. The Rev. Father Monteverde will officiate.

The weather still continues warm and sultry. It now has the appearance of Summer weather having started to visit Poché in earnest.

BACKBOARD PASSENGERS.—A list of passengers coming to Poché on the Eureka and Hamilton backboard will hereafter be published in the Record.

SOLD.—The Lightner Hook & Ladder Company yesterday disposed of their lot adjoining the San Jose House to Capt. H. S. Lubbock.

ARIZONA MAIL.—The mail from Arizona arrived yesterday at 2 o'clock. It will depart on Monday at 7 o'clock.

THE SALT LAKE STAGE and Hamilton backboard left Poché yesterday morning at 8 o'clock without passengers.

DISTRICT COURT.—The District Court will hold a session to-morrow (Monday, May 29th) at 10 o'clock.

G. HENDERSON will arrive on the Hamilton backboard this evening

BY TELEGRAPH.

SPECIAL TO THE POCHE DAILY RECORD BY WESTERN UNION LINE.

EASTERN DISPATCHES.

NEW YORK, May 27.—Mark Twain will preside at the opening of the California building, which will take place about June 15th.

The World's Washington special says: It is expected that testimony will be taken in a few days, before one of the House Committees, showing conclusively that some of the redeemed Treasury notes, which were ordered burned several years ago, were abstracted at the time and are now in circulation. These notes were first counted, put in packages, and in halves and then burned in the presence of the committee. But after the count, it is said some packages were abstracted at different times, amounting to many thousands of dollars.

The author of the story, that a large amount of money was expended to pass the Hawaiian treaty bill, claims to be able and willing to give the names and facts to a committee. The story is regarded as a canard.

A Times Washington special says, admitting that Blaine is so far likely to lead the convention, it is thought that neither of the candidates, now particularly strong, can achieve the nomination and there are to be found many among the friends of all the candidates, who will admit that there are many chances in favor of some one who has now not many delegates.

Speaking of the testimony to-day in the Blaine matter, the Times states that Hutton promised to close the investigation as speedily as possible. Of course Blaine is anxious to have it ended before the meeting of the convention, but he has no reason to complain of the action of the committee toward him. Thus far they seem not to desire to push the investigation beyond proper limits.

The Herald in an editorial remarks: The Sub Committee of the Congressional Committee on the expenditures in the Department of Justice, of which Meade is chairman, continued its investigation,

yesterday at the Astor House, into the Davenport and other cases. The object of the inquiry in this city, is to get at the truth in regard to Davenport's bill which they allege they are unable to extract from the witnesses at Washington.

The Herald reviewing the political situation repeats that Blaine will be within one hundred of a majority when he enters the Convention and the highest vote he will receive will be on the first ballot. Outside of his own State New England sends sixty-four delegates, and of these forty-two will not vote for Blaine. A candidate who is so weak in his own section where he is best known, and who is repudiated by Pennsylvania, the State of his birth, is not likely to gain strength during the progress of the convention. It has been conceded from the beginning that Hartranft will be withdrawn and that he will not receive a single vote in addition to those of Pennsylvania. No body even effects to doubt but that the Pennsylvania delegation will support Conkling when Hartranft is withdrawn. With the votes of New York and Pennsylvania Conkling only needs those of Ohio to secure his nomination. If he should get 205 of the Southern vote, and it seems probable that he will receive a much larger number when the friends of Morton admit that he cannot be nominated. It is safe to assume that Morton will not be the successful candidate, and as soon as he is out of the way the administration influence will wheel the Southern delegation into line to the support of Conkling. So if Governor Hayes will accept the nomination for Vice President there is a straight and easy path to Conkling's triumph in the Convention. With this understanding the Ohio delegates will be transferred to Conkling and Conkling and Hays will make the strongest ticket because it will secure success in the two great pivotal States of New York and Ohio, on which the election will mainly turn. Blaine would be weak in New York and would add nothing to the party strength in Ohio. He has not the slightest chance of getting any of the Morton or Briarist delegates when these candidates are taken out of the race. The foregoing conclusion that Blaine could not rescue New York from the Democrats is of itself a fatal bar to his nomination, for without the vote of New York it is impossible to elect a Republican President.

PACIFIC COAST.

SAN FRANCISCO, May 27.—Oakland held a rousing Anti-Coolie meeting last night. Several thousand persons were present, including delegations from San Francisco and all the neighboring towns.

The public schools closed yesterday for the Centennial vacation, lasting until the 10th of July.

The Bernal Heights, the scene of the recent quartz discovery, was visited yesterday by a large number of people, including many California street men. Several additional claims have been staked out and work will at once be commenced on some of them to test the question. The whole neighborhood is in a state of excitement.

There was some interesting additional evidence taken before the Senate Chinese Commission. F. L. Gordon's testimony was continued. He stated instances in which Chinamen had married women at the Rev. Mr. Gibson's establishment, paying from \$80 to \$110, besides a marriage fee of \$10. The women were taken thence to houses of prostitution.

Detective Rogers, who has been working up the matter, presented a lengthy report as to the number of Chinese engaged in the different departments of industry in the city. It includes 3,300 cigar-makers, 1,500 laundrymen, 5,000 household servants and great numbers in the manufacture of boots, shoes, slippers, ladies' underwear, etc. Eight opium dens are known to exist, patronized day and night by white men and women.

SAN FRANCISCO, May 27.—In the Third District Court to-day Theodore Leroy filed a complaint in equity against the Spring Valley Water Company and Alameda Water Company. The complaint alleges that after the Legislature of March, 1874, had approved the bill to acquire or condemn water rights for the city, that Wm. C. Ralston, Chas. Webb Howard, Charles N. Felton and J. M. Reynolds, who controlled a majority of the Alameda Company's stock, conspired to obtain control of the Spring Valley Water Company with a view to selling the Alameda water-works to the latter company for a price far exceeding the value, for their own private use, then selling the property of both companies to the city. The complaint also alleges that in pursuance of the project Ralston bribed one E. H. Deyer, Deputy Surveyor General, to give him information concerning the water supply, contrary to his official duty; that he tried to bribe R. M. Beerton, Civil Engineer, to report in his favor, and on his refusing did bribe Snowden, and also bribed a member of the Board of Supervisors to elect the latter engineer, paying each a bribe five thousand dollars. Subsequently it is alleged Ralston procured an election of a Board of Trustees of the Spring Valley Company and succeeded in selling to that corporation for a million dollars the franchise of the Alameda Water Company, which was not worth ten thousand.

In consideration of those alleged frauds the Court is petitioned to declare the acts of the trustees elected in December, 1874 void and that the defendants be restrained from disposing of any of the million dollars of the bonds issued for the purchase of the Alameda Company's Works and that they be cancelled, also that the claims of the innocent bondholders, of whom the plaintiff claims to be one, be held valid as against the Spring Valley Water Company. The complaint is very lengthy and recites many further details of alleged bribery and corrupt practices.

Next Tuesday being Decoration day, it will be in great measures observed as a holiday. The banks will be closed and most of the business houses will suspend for the day. The procession will proceed to the Cemetery at Lone Mountain, escorted by the Second Infantry, under the command of Col. R. H. Savage. An address will be delivered by Major S. W. Beckus and in the evening Col. Savage will deliver the oration.

Two cases of small-pox were reported to-day, one at 1420 Washington street and the other, a Frenchman, in the southern part of the city, who was immediately removed to the pest house. A Chinaman died of the disease in Dupont Alley this morning.

Grave charges are made against the Prosecuting Attorney of the Police Court, Noah Flood, alleging collusion with the gamblers, to defeat the ends of justice in its efforts to suppress their calling. The efforts of the Chief of Police and his subordinates, to put a stop to gambling it is represented are neutralized by the conduct of the prosecuting attorney. During the present week the Finance Committee of the Board of Supervisors has been holding nightly sessions, examining a host of witnesses. The Committee's report will be presented at the next meeting of the Board.

A communication has been received by the president of one of the Chinese companies and by him handed to the Chief of Police, dated headquarters San Francisco Anti-coolie Society, May 17, stating that for the purpose of abolishing Chinese immigration and the clearing of this city and State of the coolie population, unless a system of emigration is in full force within 21 days from date and a sufficient number of coolies shipped from this port to satisfy us of your intentions to clear this city of the same, it is the most decided intention to clear the same by force of arms.

An attempt was made to-day to have the Stock Boards adjourn over until Wednesday on account of Decoration Day, but finally decided to hold sessions as usual.

Private advices from Bernal Heights say there is nothing in it—no gold there. An assessment of one dollar per share has been levied by the Eureka Consolidated delinquent June 30th:

SOLE AGENT.—W. R. Wilson is sole agent for San Francisco Post, Daily Enterprise, Salt Lake Tribune and Eureka Sentinel. Also dealer in California and New York newspapers, school books, stationery, music, cigars and tobacco, Press Wand's Saloon.
